Figures x

Chapter 1 Introduction

History of aircraft weight engineering 1-1

Weight engineering and the aircraft development process 1-2

Career objectives and benefits 1-4

Weight estimation methods for the academic environment 1-5

Note on Military Standards 1-5

Chapter 2 Aircraft requirements

Elements of an operational requirement 2-1

Development of operational requirements 2-3

Chapter 3 Impact of weight on aircraft performance

Effect of weight on range for a jet aircraft 3-2

Effect of weight on turn radius 3-5

Chapter 4 Aircraft design synthesis

Synthesis development 4-2

The aircraft sizing process 4-4

Plotting of synthesis results 4-7

Chapter 5 Introduction to weight estimation

The weight estimating task 5-1

Weight estimation methods 5-3

Growth factor 5-5

Contents

Chapter 6 Conceptual weight estimation

Constant weight plus variable weight fraction 6-1

Variation with gross weight, wing area and thrust 6-3

Chapter 7 Statistical weight estimation

Unit weight relationships 7-1

Group level equations 7-1

Expansion to detail level equations 7-8

Statistical data considerations 7-11

Chapter 8 Quasi-analytical weight estimation

Wing structure estimation 8-2

Chapter 9 Analytical weight estimation

Hydraulic actuator weight determination 9-2

Finite element analysis for weight estimation 9-6

Chapter 10 Weight estimation of unusual design concepts

Influence tree for LO aircraft 10-2

Chapter 11 Adjustment of estimated weight values

Method of adjustment 11-1

Accuracy of weight adjustments 11-3

Adjustment for weight reduction 11-4

Adjustment for weight penalties 11-6

Adjustment for special features 11-7

Chapter 12 Other mass properties

Aircraft coordinate systems 12-1

Center of gravity 12-2

Moments of inertia 12-12

Distributed mass properties 12-15

Total mass properties computation 12-16

Contents

Chapter 13 Reasonability checking

Estimated weight checks 13-1

Checking of other mass properties 13-3

Chapter 14 Method validation and risk assessment

Method validation 14-1

Risk assessment 14-3

Weight risk analysis 14-5

Weight risk reduction 14-8

Analysis application 14-9

Chapter 15 Proposal activities

Pre RFP coordination with military customer 15-1

Evaluation and adherence to military specifications 15-2

Support, integration and submission of military proposals 15-3

Proposal equivalent for commercial aircraft 15-4

Chapter 16 Military weight engineering for initial phases

Mass properties at other government agencies 16-5

Chapter 17 Weight growth

Chapter 18 Weight control

Chapter 19 Planning for weight control

Elements of a plan 19-1

Weight control plan 19-2

Chapter 20 Value of a pound

Value of a pound from value added 20-1

Value of a pound from program economics 20-3

Using value of a pound in trade studies 20-5

Contents

Chapter 21 Supplier weight control

- Review of RFP 21-2
- Review of supplier proposal 21-2
- Supplier contracts 21-3
- Working with suppliers 21-3

Chapter 22 Special weight reduction programs

- Criteria review 22-1
- Weight review teams 22-2
- Incentive programs 22-3

Chapter 23 Principles of design coverage

- Layouts and detail drawings 23-2
- Weight optimization with design evolution 23-2
- Structural loads 23-4
- Structural margin 23-4
- Structural joints and fastening 23-5
- Structural load paths 23-7
- Doors and cutouts 23-8
- Considerations for use of composite materials 23-9
- Aircraft subsystems 23-11
- Weight control check list 23-12

Chapter 24 Weight computation

- Weight computation from initial drawings 24-1
- Weight calculation 24-4

Chapter 25 Weight and C.G. measurement

- Actual weight plan 25-1
- Charts and forms 25-2
- Weighing equipment 25-3

Contents

Chapter 26 Weight accounting and reporting

Elements of an accounting and reporting system 26-1

Weight reporting requirements 26-4

Chapter 27 Aircraft testing

Material characterization 27-1

Component testing 27-2

Full scale structural tests 27-2

Subsystem testing 27-3

Drop test 27-5

Flight test program 27-5

Chapter 28 Military agency weight control activities

Engineering and manufacturing development programs 28-1

Used, leased and aircraft modification programs 28-5

Military test activities 28-6

Chapter 29 Weight growth after design completion

Chapter 30 Later phase weight engineering by contractors

Continuing changes 30-1

Change proposals 30-2

Change analysis 30-3

Retrofit and modification kits 30-4

Production lots 30-4

Tracking by aircraft 30-5

Weight reduction programs 30-5

Flight test support 30-6

Weight reporting for production aircraft 30-7

Proposals for production aircraft 30-7

Aircraft evolution 30-8

Out of production aircraft 30-11

Contents

Chapter 31 Customer weight engineering after delivery

Military production aircraft 31-1

Weight management of operational aircraft 31-2

Loading considerations 31-3

Maintenance/overhaul facilities 31-4

In service weighing 31-5

Appendix A Additional weight/performance/cost relationships

Effect of weight on performance A-1

Effect of weight on range for a propeller driven aircraft A-1

Effect of weight on endurance of a jet aircraft A-3

Effect of weight on endurance of a propeller driven aircraft A-5

Effect of weight on absolute ceiling A-8

Effect of weight on maximum climb angle and climb rate A-11

Effect of weight on takeoff distance (ground roll only) A-15

Effect of weight on landing distance (ground roll only) A-19

Influence of weight on cost A-20

Development and production costs A-20

Operational Costs A-22

Appendix B Weight adjustment guidelines

Advanced materials B-1

Estimation of materials weight reductions B-4

References for structural weight estimation B-5

Advanced aircraft systems B-5

Appendix C Weight risk evaluation example

Glossary
