What is one of the factors most critical for company success?
It's having the estimated performance of the product fulfill the customer's expectation.

A key enabler to ensure this is:

Mass Properties Engineering

The Society of Allied Weight Engineers
(SAWE)

is an international non-profit organization whose purpose is to:

- promote the mass properties discipline and provide members and industry a medium for exchanging practices and experiences with the objective of fostering a higher degree of quality in mass properties.
- stay up to date by actively participating and contributing to the annual conference by setting industry standards, sharing recommended practices, introducing new technologies, building networks and shaping the Mass Properties future, enabling your company to achieve the right performance of your product.
 - provide and promote the following SAWE committees: Standard & Practices, Aerospace, Airline Affairs, Marine, Missiles & Space, Military Aircraft, Offshore and Ground Vehicles.
 - hold an annual international conference which contains: Technical Presentations, Papers, Technical Forums, and Training.

SAWE Corporate Partners

Additionally to the conference there will be:

Social events organized to increase networking between Companies, Universities and Students
