Welcome Students!

The Society of Allied Weight Engineers (SAWE) would like to extend a special conference welcome to students. We realize that both your time and budget are especially limited as a student, and we appreciate the effort you are making to be here to present your work and, hopefully, learn more about mass properties engineering and SAWE. The SAWE organization is invested in encouraging and mentoring the next generation of mass properties engineers. We are excited to host our student attendees with either free (for student presenters) or reduced cost (for non-presenting student attendees) registration for the entire conference, including the welcome reception; admittance to all paper sessions; standards and practices luncheon; and the awards banquet at the conclusion of the conference. In addition, our students are invited to test their courage by taking free surfing lessons. Thrill-seekers around the world head to Cocoa Beach to catch a sight of phenomenal waves. Did you know? Cocoa Beach has some of the best wind surfing and surfing instructors in the world! There is also a tour of the Kennedy Space Center (cost is \$85). We hope you will find attending the 82nd International SAWE Conference an enjoyable experience, but, more importantly, we hope you will find it a wonderful opportunity to talk to and interact with our professional members and industry sponsors. We are happy to answer your questions and share our professional journeys with you!

Dr. Donna Gerren
