Welcome Students!

Dr. Ali Elham

SAWE Vice President Academic Affairs
University of Southampton, UK

Dr. Donna Gerren

SAWE Deputy Vice President Academic Affairs
University of Colorado Boulder - Retired

The Society of Allied Weight Engineers (SAWE) would like to extend a special conference welcome to students. We realize that both your time and budget are especially limited as a student, and we appreciate the effort you are making to be at our event to present your work and, hopefully, learn more about Mass Properties Engineering and SAWE.

The SAWE organization is invested in encouraging and mentoring the next generation of mass properties engineers. We are excited to host our student attendees with either free registration for student presenters, or reduced cost for non-presenting student attendees. Registration for the conference includes our Welcome Reception, admittance to all paper sessions, our Standards and Practices luncheon, and the Awards Banquet at the conclusion of the conference. In addition, our students are invited to attend some special events designed just for them.

We hope you will find attending the SAWE 84th International Conference an enjoyable experience but, more importantly, we hope you will find it a wonderful opportunity to talk to and interact with our professional members and industry sponsors. We are happy to answer your questions and share our professional journeys with you! Contact us at academic.committee@sawe.org.

See You in Albuquerque!
